

EVENT REPORT

Two-Day Workshop on

“Nanotechnology for Smart Sensors and Sustainable Engineering”

Organized by IEEE Nanotechnology Council MJCET Student Branch Chapter (SBC)

in collaboration with IEEE Nanotechnology Council, Hyderabad Chapter

Venue: Muffakham Jah College of Engineering and Technology (MJCET), Hyderabad

Dates: 1–2 September 2026

1. Introduction

A two-day workshop on “Nanotechnology for Smart Sensors and Sustainable Engineering” was organized by the IEEE Nanotechnology Council MJCET Student Branch Chapter (SBC) in collaboration with the IEEE Hyderabad section IEEE Nanotechnology Council, Hyderabad Chapter, on 1–2 September 2026. The programme was designed to introduce students to contemporary developments in nanotechnology, smart sensing systems and their relevance to sustainable engineering. The workshop commenced with an Inaugural Session, attended by the distinguished Chief Guest, Dr. Nageshwara Rao, along with Dr. S. Srinivas Rao, Principal, MJCET; Dr. Ferhatullah Hussainy, Dean, Student Affairs; Narsimha Rao Garu, Registrar; Dr. G. Sailaja, Faculty and Workshop Coordinator, IEEE Nanotechnology Council (NTC) MJCET. Dr. Kareem, Co-Coordinator; and the Heads of various Departments.

The inaugural programme was also attended by faculty members and student participants. The dignitaries highlighted the importance of emerging technologies, research and innovation, and encouraged students to actively explore the interdisciplinary applications of nanotechnology, smart sensors and sustainable engineering.

The workshop brought together faculty members, invited experts and students from different engineering disciplines. The programme combined expert sessions, academic interaction and a technical exposure visit to the Centre for Nanotechnology, University of Hyderabad (HCU).

2. Objectives of the Workshop

To create awareness about nanotechnology and its emerging engineering applications.

To introduce the role of nanomaterials and nanoscale phenomena in smart sensor development.

To highlight the relevance of nanotechnology to sustainable engineering solutions.

To provide students with interaction opportunities with experts and researchers.

To expose participants to an active nanotechnology research environment through the visit to the Centre for Nanotechnology, University of Hyderabad.

3. Programme Schedule and Activities

Day / Session	Session	Major Activity	Venue
Day 1 – Morning 1 September 2026	Inaugural & Technical Session. Inaugural Session was attended by the Chief Guest Dr. NageshwaraRao, Principal,MJCET Dr.S.Srinivas Rao, Dean, Student affairs, Dr. Ferhatullah Hussainy,Registrar, Narsimha Rao garu, Faculty and workshop coordinator, NTC MJCET Dr.G.Sailaja, Workshop Coordinator, Dr. Kareem and Heads of the Departments	Registration, inaugural proceedings, introduction to the workshop and expert technical interactions on nanotechnology, smart sensors and sustainable engineering.	MJCET, Hyderabad
Day 2 – Technical Visit 2 September 2026	Industrial / Research Exposure Visit	Visit to the Centre for Nanotechnology, University of Hyderabad (HCU), providing participants with exposure to the research ecosystem and nanotechnology activities.	Centre for Nanotechnology, University of Hyderabad

4. Day 1 – Morning Session

The first day of the workshop commenced at MJCET with the gathering of faculty members, invited experts and student participants. The morning session included the inaugural proceedings and the formal introduction to the objectives and scope of the two-day workshop.

The technical discussions by Prof NageshwaraRao focused on the importance of nanotechnology as an interdisciplinary field and its growing relevance to smart sensors and sustainable engineering. The participants were introduced to the broad scope of nanoscale materials and technologies and their potential role in addressing present-day engineering challenges.

The session provided an effective platform for students from different branches to interact with experts and understand the relevance of nanotechnology to their respective disciplines. The active participation of students contributed to an engaging academic environment.

Photographic Highlights – Day 1 Morning Session

5. Day 2 – Morning Session

6. Day 2 – Visit to the Centre for Nanotechnology, University of Hyderabad

A major highlight of the workshop was the technical exposure visit to the Centre for Nanotechnology, University of Hyderabad (HCU). The visit provided the participants with an opportunity to experience the academic and research environment associated with advanced nanotechnology research.

The participants visited the Centre for Nanotechnology and interacted in an environment that complemented the theoretical discussions conducted during the workshop. During the visit, students were introduced to the cleanroom and micro/nano fabrication facilities, including the yellow room and mask aligner used for UV photolithography, fume cabinets and wet benches, and other fabrication facilities. The students were also given an overview of important nanofabrication processes such as photolithography, spin coating, dry etching, Reactive Ion Etching (RIE), thermal deposition, sputtering, evaporation, and thin-film deposition.

The faculty also explained advanced characterization and processing facilities, including instruments used for surface profiling, thermal processing, electrical measurements, and microscopic analysis. The students gained valuable exposure to the complete process involved in the fabrication, deposition, processing, and characterization of micro- and nanoscale devices.

The visit helped students appreciate the connection between classroom learning, advanced research and real-world technological development.

The group visit also encouraged students to consider research-oriented careers and to understand the importance of interdisciplinary collaboration in developing future technologies for smart and sustainable applications.

Participants for the visit to the Centre for Nanotechnology, University of Hyderabad

Participants during the visit to the Centre for Nanotechnology, University of Hyderabad

7. Participant Participation

Students from multiple engineering branches participated in the workshop. Attendance was recorded for the sessions, and the signed participant lists are enclosed as annexures to this report. The participant records include student names, roll numbers/contact details, branch information and signatures, wherever recorded.

The participant lists and attendance sheets are attached as documentary evidence of student participation in the workshop and associated activities.

8. Outcomes of the Workshop

1. Enhanced awareness among students regarding nanotechnology and its engineering applications.
2. Improved understanding of the role of nanotechnology in smart sensors.
3. Exposure to sustainable engineering perspectives and emerging research areas.
4. Opportunity for direct interaction with faculty members, experts and researchers.
5. Practical research exposure through the visit to the Centre for Nanotechnology, University of Hyderabad.
6. Encouragement for students to pursue interdisciplinary research and advanced studies.

9. Conclusion

The two-day workshop on “Nanotechnology for Smart Sensors and Sustainable Engineering” was successfully conducted with active participation from students and faculty members. The combination of technical sessions and the research exposure visit provided participants with both academic understanding and practical exposure. The programme served as a valuable initiative in promoting awareness and interest in nanotechnology and its future applications in smart and sustainable engineering.
