

An Introduction to CUDA Programming with the Nvidia Jetson Nano

Join the IEEE Computer Society as we introduce you to the fundamentals of GPU programming in CUDA using the Nvidia Jetson Nano! Our speaker, Yash Manian of IAM Robotics in Pittsburgh, will be introducing you to what a GPU is, its capabilities, how they can be beneficial to your projects, and guide you through a few experiments where you will get to see for yourself how performance can be enhanced with proper GPU utilization!

Space is limited

To reserve your seat, please RSVP at <https://events.vtools.ieee.org/event/register/289195>
