Phone: 502.585.3700

Website: <https://flanagansalehouse.com/>

Price: IEEE members and Guests are welcome. No Host Bar and Food.

RSVP: No RSVP needed. If you wish, you can email Jim Graham, LMAG Chair at james.graham@louisville.edu.

Topic: Creating HDTV Videos from your Photos

Speaker: Lee Hoke, IEEE Life Fellow

Abstract:

Don't keep your photos trapped in a little camera or cell phone. There are techniques for moving those photos to your computer. Then learn the process for creating a unique video of those photos and finally transporting the show to any Big-Screen (HD)TV. A 20-minute show will display samples of videos which have been created over the past years. During the discussion, Lee Hoke will guide you through the techniques required to create 'Your Big Show'.

All Section members are welcome to attend. Come have a brew with us (and some good Irish food too) and enjoy the fun! No RSVP needed, just show up!

Speaker Bio:

Lee is an IEEE Life Fellow, and former Magnavox (now Phillips Electronics) Chief Engineer in charge of color TV design. He has 4 US patents and has published over 20 technical papers for McGraw Hill. Previously, Lee served on the governing board and treasurer of the Consumer Electronics Society of the IEEE. Lee was made a Fellow of the IEEE in 1994.

Co-Sponsors:

This Event is Co-sponsored by the IEEE Louisville Section.
