

REPORT

IEEE DAY 2023

Date: 3rd October 2023

G H Patel College of Engineering & Technology,
CVM University

Introduction

IEEE Day, 2023 celebration hosted by IEEE GCET SB, was an one-day event held on October 3, 2023, filled with exciting festivities and community spirit. IEEE Day was a vibrant celebration, featuring an array of engaging activities, from thrilling games to the joyous cutting of a celebratory cake. It was a day dedicated to embracing the spirit of innovation, collaboration, and the rich heritage of IEEE.

About the Event

IEEE Day was an occasion to celebrate the impact of engineering on our daily lives and to promote IEEE's mission, which is to foster technological innovation for the benefit of humanity. IEEE GCET SB organized some thrilling and intellectually stimulating team games and activities to celebrate IEEE Day 2023. Some of them are described below:

Riddle Battle

In Riddle Battle, teams competed by answering challenging riddles. Each team member was presented with one technical or mathematical riddle and had only one minute to solve it. The game combined quick thinking, problem-solving skills, and teamwork, as participants work together to crack the riddles.

Question Question

In this intriguing game, two teams faced off in a battle of questions. The catch was that only questions were allowed - no answers! Teams took turns asking questions, and the goal is to outwit the opposing team with clever and strategic inquiries. Each round lasted for 1.5 minutes, adding an element of time pressure to the intellectual challenge.

Wheel of Misfortune

Wheel of Misfortune was a game that involved a lit bit of luck and courage. A virtual wheel was spun and the team had to perform the tasks that showed up on the wheel.

Game 4: Heads Up

This classic game also added a fun element to the celebration, where each team played to get ahead in the competition. The catch was that each team had time limit of 2 minutes for this game, making it a fast-paced and engaging activity.

At the end of these activities, the top performing teams were rewarded with prizes.

Following these fun activities and networking sessions, there was a celebratory cake cutting to commemorate IEEE Day. Nearing the end of the celebrations, the attendees and organizing committee enjoyed lunch together.

Conclusion

The event organized by IEEE GCET SB was a resounding success, and it owes its success to the unwavering dedication and tireless efforts of the remarkable volunteers. The commitment, enthusiasm, and hard work displayed by the volunteers were instrumental in making the event a memorable and engaging experience for all participants. Their passion for technology and their willingness to contribute their time and expertise truly exemplified the spirit of IEEE.
