OSI layer

- **Application layer:** user program that generates data.
- **Presentation layer:** changes syntax (data format) if necessary.
- **Session layer:** synchronizes sessions (dialogues).
- **Transport layer:** end-to-end connection management, error recovery.
- **Network layer:** routes data through network.
- **Link layer:** framing, error recovery on links, including MAC.
- **Physical layer:** point-to-point medium-dependent transmission.
