

IEEE ComSoc Sister Chapters 2024 Lecture Series

On Darkweb's Anonymity Networks

Tuesday June 11, 2024 @ 5 PM Lebanon (GMT +3)

@ 7:30 PM Delhi (GMT +5:30)

Topic: Understanding the properties of anonymity networks such as the Invisible Internet Project (Garlic router) and Tor (Onion router) is critical for the future of cybersecurity, cyberwarfare, and Internet freedom. Let's talk about how we can theoretically model the Invisible Internet and its key network properties such as resilience.

Speaker: Jacques Bou Abdo is an interdisciplinary researcher interested in the flow of cyberattacks and network resiliency in cyber warfare. Dr. Bou Abdo currently serves as assistant professor at the School of Information Technology at the University of Cincinnati, USA.
