

NEW HORIZON
COLLEGE OF ENGINEERING

IEEE DAY 2024 EVENTS

- **Title : “Blitz Bash”**
- **Nature of the Event:** Non-Technical Event
- **Date : October 4th**
- **Time : 10:00 am to 4:00 pm**
- **Name of the Faculty Coordinator : Dr. B Swathi**
- **Number of Teams/Participants: 30 teams (90 Participants)**
- **Brief report :**

On October 4, 2024, the IEEE New Horizon College of Engineering Student Branch from the IEEE Bangalore section organized *Blitz Bash* as part of the IEEE Day celebrations. The event was a resounding success, attracting 90 participants who eagerly joined an afternoon filled with fun and excitement. The activities were designed to foster team-building, creativity, and social engagement, which helped participants build new connections and strengthen their skills.

The event featured three main activities: *Video with a Stranger*, *Musical Chairs*, and *Treasure Hunt*, each offering a unique experience for participants. The **Video with a Stranger** activity encouraged students to step out of their comfort zones and engage in conversations with new people. This not only broke the ice but also allowed participants to develop social connections and build their networking skills in a relaxed setting. Many found the activity eye-opening and enjoyable, as it encouraged them to interact with fellow students they might not have encountered otherwise.

The second activity, **Musical Chairs**, brought a competitive yet fun dynamic to the event. The game allowed participants to enjoy the thrill of competition in a friendly environment. With each round, the competition intensified as participants raced to secure a chair when the music stopped. The fast-paced nature of the game created excitement and laughter, with participants demonstrating their quick thinking and agility. This familiar game allowed everyone to unwind and enjoy some lighthearted fun amidst the competitive spirit.

The **Treasure Hunt** was the final and most challenging activity, requiring participants to use their problem-solving and teamwork skills to succeed. Teams raced across the campus to find hidden clues and treasures, working together to decipher riddles and solve puzzles. This adventure-like challenge tested their collaboration, creative thinking, and ability to think on their feet. The Treasure Hunt quickly became a highlight of the day, as teams bonded over shared problem-solving efforts and the excitement of the chase.

One of the event's most significant achievements was the high engagement rate, with 95% of participants actively involved in each of the activities. Their enthusiasm and competitive spirit were evident as they embraced every challenge presented. The feedback from participants was overwhelmingly positive, with many expressing their appreciation for the variety of activities and the opportunity to meet new people. The blend of social interaction, team-building, and creative problem-solving offered a memorable experience for all attendees.

The success of *Blitz Bash* was made possible by the dedication and hard work of the event organizers, volunteers, and participants. Their collaboration and commitment played a crucial role in making the event enjoyable for everyone. The seamless execution of the event activities demonstrated the effectiveness of teamwork and thoughtful planning in creating meaningful experiences for the students.

In conclusion, *Blitz Bash* was an outstanding success, providing participants with an opportunity to

build new relationships, enhance their problem-solving abilities, and enjoy a day of fun-filled activities. The event underscored the importance of creating spaces for students to come together, share experiences, and develop both social and intellectual skills. Moving forward, organizing similar events will continue to foster community spirit, promote collaboration, and leave lasting memories for all involved.
