About the Event:

The Presentation Challenge was a dynamic event carried out in LHC Seminar Hall II, it was designed to test participants' creativity, teamwork, and presentation skills in a high-pressure setting. Individuals were grouped into random teams and tasked with preparing a presentation or pitch on a topic or product provided by the organisers within just 30 minutes. This challenge encouraged participants to think creatively, collaborate effectively, and deliver engaging presentations under strict time constraints. Judging was based on creativity and originality, the quality and clarity of the pitch, audience engagement, and the strength of teamwork and collaboration.
