

IEEE Southeastern Michigan

Presents

“Transistorized!”

John Bardeen (left), William Shockley, and Walter Brattain (right) at Bell Labs in 1948; Bardeen and Brattain invented the point-contact transistor in 1947 and Shockley invented the bipolar junction transistor in 1948.

Transistorized! Traces the discovery, invention, and impact of the transistor, perhaps the most important invention of the 20th century. Hosted by Ira Flatow, the documentary recounts how American life was utterly transformed by the transistor, and how its basic principles have flowered into technologies that will dominate the next century. We will leave plenty of room for attendee discussions and Q&A.

At Glance

- **When:**
Date: Feb 14th, 2024
Time: 6:00– 7:00 PM
- **Where:**
Online via Webex (to be shared only after you have a confirmed registration)
- **Audience:** All eligible members and potential members (only if slots available)
