

Event Report:

PES RES for Kids: Coloring a Greener Future: Clean Energy for a Brighter and Better Tomorrow!

Date of Event: April 22, 2025

Time of Event: 10:00 am-01:00 pm

Venue: Cumilla, Bangladesh.

Organized By: IEEE NSU PES SBC

Number of Total Participants: 40+

IEEE NSU Power and Energy Society Student Branch Chapter successfully conducted the PES RES for Kids Project in Bangladesh this year through an exciting art competition titled “*Coloring a Greener Future: Clean Energy for a Brighter and Better Tomorrow!*” at Laribag Government Primary School, Cumilla, as part of the Global PES Day 2025 celebrations.

The event aimed to raise awareness among kids about the importance of clean energy and sustainability through creativity and fun. With the guidance of Headmaster Md. Abdus Salam and Village Representative Md. Abdul Khaleq Shahin, the program saw enthusiastic participation from the children who expressed their visions of a greener future through colorful drawings.

Volunteers from IEEE NSU PES SBC facilitated the activities and interacted with the children, helping them understand basic energy concepts in an enjoyable way. Over 40 kids took part in the competition with great joy and energy.

The top 5 artworks were recognised with prizes and certificates, while all participants received exciting gifts to celebrate their creativity and engagement. The event successfully blended education, fun, and sustainability, making it a memorable PES Day initiative.
