

IEEE Southeastern Michigan Section
Invites you to the next
“Senior Membership Elevation Guidance Session”

IEEE Southeastern Michigan Section will reprise its Senior Member Round up event, on February 14th, 2026, between 11am and 12noon. Senior Member Reviewers will assist interested member candidates with significant years of experience in their profession.

The way it works is:

- At least 10 years of significant experience with Bachelor's degree needs be established to initiate the senior membership elevation.
- If you have a PhD degree - that is considered to be 5 years of significant experience, so you need 5 additional years of experience beyond that.
- If you have a Master's, that is equivalent to 2 years of significant experience. So, you will need 8 additional years to qualify.

There is no cost to becoming a Senior Member, and this step is a necessary prelude to seeking the IEEE 'Fellow' level. For a complete description of the Senior Member process and its benefits, see the link: https://www.ieee.org/membership_services/membership/grade_elevation.html

Potential senior members, please register on this site for the event and be ready with digital copies of your resume, and relevant supporting materials, to share with reviewers.

Existing Senior Members are requested to also register and assist potential new members with their application processing.

Pre-Registration Required!
