

SYMPOSIUM

Power Electronics for Energy Transition

September 29-30, 2026
Vienna, Austria

Power Electronics is one of the key technologies for the energy transition. Two of Austria's largest research centers for electronic systems – **AIT Austrian Institute of Technology** and **Silicon Austria Labs (SAL)** have joined forces to organize this event as a meeting point for industry and academia in central Europe.

The Power Electronics for Energy Transition Symposium will focus on newest technology for **Medium-voltage power electronics**, **Grid-forming systems** (AC and DC), **Electrification of industrial processes** and **E-mobility** – from Automotive to Aerospace.

Call for Abstracts: Both academia and industry is invited to contribute to a successful symposium by giving a talk or poster presentation. Hand in your short abstract until **4 May 2026**.
